

## 2013 Action Plan Lake Beulah Protective and Improvement Association

1. Inform and educate the Lake Beulah Protective and Improvement Association (LBPIA) membership of land and lake use laws and regulations.
2. Support the Lake Beulah Management District (LBMD), the Town, County and State in their enforcement, with emphasis on lake weeds, shore lands management, landscaping and boat laws.
3. Work with the Wisconsin Department of Natural Resources, the LBMD, LBPIA members, volunteers and other experts to monitor and improve the overall health of Lake Beulah's fish, wildlife, forests and aquatic ecosystem. Pursue the latest state of the art water quality monitoring and reporting techniques; obtain available training to carry out these tasks; and summarize results in reports for meaningful interpretation and follow up.
4. Monitor proposed developments that may affect the Lake and its surrounding environs including but not limited to the Village well. Act when such developments conflict with the mission, views and interests of the LBPIA.
5. Support local area educational outreach to youth such as the annual "Water Education Days" for students, in partnership with Edwards YMCA Camp.
6. Monitor, review, and communicate boating laws and water safety issues to LBPIA members.
7. Partner with Walworth County's Aquatic Invasive Species Control and Prevention program to reduce the potential of invasive species entering Lake Beulah waterways.
